(*): S = Spare part, W = Wear part, H = Hardware, NA = Not Available

NA = Not Available / this component is not available as wear part.

H : Not supplied alone / this component is a component standard which you can easily find at all the standard retailers of parts. All the standard components of assembly have a quality grade 8.8. We recommend to don't use a quality grade lower than 8.8.

W : Wear parts are worn out through normal use of the machine. The use period depends a lot on the intensity of work of the machine.

Wear parts must be serviced, used and eventually changed following the indications of the manufacturer. Any wear due to normal use of the machine will not be considered as a case of warranty.

S : Genuine CLIPPER replacement parts should always be used.
