SLURRY MACHINE CSL 501

SLURRY MACHINE CSL 501

FEATURES & BENEFITS

- Processes 500l/h thanks to high performing air compressor, hydraulic pump and filters.
- Includes 3 containers for dirty water, treated water and compressed slurry, ensuring a cleaner and efficient process for the user.
- Integrated air compressor ensures the machine is an ideal portable solution for slurry processing.
- Adjustable grip and star wheel for easy transport on the job site.
- Compact dimensions ensures the machine is easily transported around workplace and stored safely. Also allows machine filtration system to be used horizontally and stored in vertical position.

The Norton Clipper **CSL 501 SLURRY MACHINE** provides a compact solution for the treatment of used water. Its robust structure and efficient process can be operated with as little as 230 V while providing significant output of 500L/h. The Norton Clipper SLURRY MACHINE is the ideal solution to treat your work site waste.
